Profile

Junior AI Research Engineer with publications on LLMs and R&D internships (aerospace & academia).

Publications

- Distilling the Complexity of Agent-Based Simulations Into Textual Explanations via Large Language Models. **Flandre N.**, Giabbanelli P. J. (2026). Big Data and Cognitive Computing
- Promoting empathy in decision-making by turning agent-based models into stories using large-language models. Daumas C., Giabbanelli P. J., **Flandre N.** (2025). Journal of Simulation
- Can large language models learn conceptual modeling by looking at slide decks and pass graduate examinations? an empirical study. **Flandre N.**, Giabbanelli P. J. (2024). ER 2024 (EmpER'24)

Skills

ML/AI: PyTorch, TensorFlow, Transformers (Hugging Face)

Data & MLOps: Python, R, SQL, Pandas, NumPy, Docker, Git, REST, Streamlit, Gradio

Cloud & DB: Google Cloud Platform, MongoDB, MySQL, ChromaDB

Experience

AI Research Engineer — Inria

Conducting research on LLM-based geoparsing

Montpellier, France

Apr 2026 — Present

- Linking unstructured text to geographic locations and footprints

AI Research Engineer Intern — Airbus Defence and Space

Conducted research on the underlying AI model of Airbus Geo Explore

Toulouse, France

Jun 2025 — Nov 2025

- Built a remote sensing benchmark suite to compare VLMs and training strategies.
- Implemented end-to-end fine-tuning pipelines on GCP for VLMs on satellite imagery

Research Intern (LLMs & Simulation) — VMASC

Applied LLMs to simulation and decision-making

Suffolk, VA, USA

Aug 2024

- Leveraged GPT-4o and Claude 3.5 to explain simulation outputs
- Applied BERT/BART for extractive/abstractive summaries.
- Evaluated outputs with BLEU, ROUGE, and METEOR

Research Intern (LLMs) — Miami University

LLMs for conceptual modeling and multimodal evaluation

Oxford, OH, USA

May 2024 — Jul 2024

- Linked causal maps using LLMs and word embeddings
- Assessed LLMs on master-level conceptual modeling tasks
- Studied prompt engineering impacts on task performance and reliability

Education

IMT Mines Alès — MEng, Data Science & AI

- Hackathons : Ariane Group (3rd) / Altémed (1st) / Best English Debater

Alès, France

Expected 2025

IIT Bombay — Exchange Semester

- AI & Image Processing

Mumbai, India

Jan 2025 — May 2025

Projects

DeepSeek Models — Jailbreak Robustness Evaluation

- Engineered local/API-based jailbreaks, assessment with Claude API.

Apr 2025

GPT-2 Training From Scratch (2xH100, PyTorch DDP)

- Trained a virgin GPT-2 model on FineWeb-Edu 10B evaluated on HellaSwag.

Mar 2025
